## Europe

### Ukraine

#### Global Hunger: The Ukraine Effect

The report explores the impact of the Ukrainian conflict on global food supplies by examining how specific conflict actions and incidents within Ukraine contributed to global food insecurity. It discusses how conflict events and reactions to them affect food production and exports in the current conflict. It ends by highlighting the context in some of the countries particularly dependent on food imports from Ukraine and Russia.

**This Bi-Monthly News Brief comprises threats and incidents of violence affecting the delivery of humanitarian assistance.** It is part of the Aid in Danger project, by Insecurity Insight. It is prepared from information available in local, national and international news outlets and online databases. The incidents reported are not a complete nor a representative list of all events that affected the provision of aid delivery and have not been independently verified. All decisions made, on the basis of, or with consideration to, such information remains the responsibility of their respective organisations. Insecurity Insight continues to update data on aid workers killed, kidnapped or arrested (KKA) and figures may change. Updated data includes new and historic reports identified in open-sources and verified security incidents submitted by Aid in Danger partner agencies. This document is made possible by the generous support of the American people through the United States Agency for International Development (USAID). The contents are the responsibility of Insecurity Insight and do not necessarily reflect the views of USAID, the U.S. Government, or Save the Children Federation, Inc.
