Incidents of threats and violence in refugee camps

October
2024

Insecurity Insight identified 1670 incidents that took place at refugee camps in the occupied Palestinian territory (oPt) between 07 October 2023 and 30 September 2024. Of these, 1252 were recorded in the Gaza Strip and 418 in the West Bank, including East Jerusalem. 99% of all recorded incidents were attributed to Israeli forces. Three incidents involved Israeli settlers raiding camps or opening fire at residents in the West Bank, and East Jerusalem. Qassam Brigades and other unidentified armed groups were named as perpetrators but less often. Access the data on [HDX](#). Due to [HDX policy](#), our data on the oPt does not include event descriptions or geo-coordinates. [Contact us](#) for curated datasets. Follow [us](#) for the latest dataset updates. Surprise Israeli ground invasion into Jabalia Refugee Camp

On [05 October 2024](#), Israeli forces entered Jabalia Refugee Camp for the third time since the war started over a year ago. The camp was encircled, Israeli tanks entered the camp and numerous airstrikes were carried - causing massive and large-scale destruction to the camp and forcing residents to evacuate the area. Since the ground assault began, humanitarian aid has been unable to reach the area, leaving residents without humanitarian assistance - including food and medical supplies. Hospitals, schools and residential buildings have all come under attack. On 14 October, two schools sheltering displaced Palestinians, an aid distribution centre and the gate of al-Yemen al-Saeed Hospital were struck by Israeli airstrikes or artillery shelling. Since the ground assault, internet and communication communications were cut off or limited and information coming out of the area is limited, however, it is estimated that [at least 2,000 people](#) have been killed in northern Gaza. See 'Jabalia Refugee Camp' section for information on individual incidents.

The incidents reported below are not a complete nor a representative list of all events that took place at refugee camps in October 2024 in the oPt and have not been independently verified through on the ground investigations. There is a delay in reporting incidents due to our open-source verification process. Numbers may change if or when further information is made available. We are continuously trying to identify more specific details on these incidents. If you have additional information on an incident documented here, or a new incident please [get in touch](#).
