Documented incidents

03 November 2025: In Karnoi town, North Darfur state, a children's hospital was struck by an RSF drone strike, killing seven people, including women and children, and injuring an unspecified number of others. **Source:** [Xinhua](#)

06 November 2025: In Dilling city, South Kordofan state, the radiology department buildings of Dilling Teaching Hospital were damaged by artillery shelling fired by the forces of the Alliance of Establishment forces, consisting of the SPLM-N faction and the RSF, on the area, killing seven people and injuring 12 others. **Source:** [Sudan War Monitor](#)

Other resources

Health care provision has unique characteristics that shape its specific exposure to security risks in conflict zones. The Security Risk Management for Health Care (SR4H) Handbook – available in [Arabic](#), [English](#), [French](#) and [Spanish](#)– provides guidance on how to implement a range of actions intended to promote respectful and violence-free environments and prepare individuals or organisations to face and respond appropriately to violent incidents, also dealing with the aftermath of such events.

While this handbook is primarily aimed at health programme managers providing frontline services, it is also highly relevant for non-governmental organisations (NGOs) working with partners who implement healthcare services. The handbook helps to identify practical activities that local health partners can implement and that NGO partners can include in partnership agreements and budget for.

The SR4H Handbook brings together some of the best practices on security risk management and proposes a framework adapted for health care providers working with limited resources. The objective is to promote an approach that considers the safety and security of health professionals while ensuring patients' access to care.

This document comprises threats and violence as well as protests and other events affecting the delivery of and access to health care. It is part of the **Attacks on Health Care** project by **Insecurity Insight**. It is prepared from information available in local, national and international news outlets and online databases. The incidents reported are not a complete nor a representative list of all events that affected the provision of health care and have not been independently verified. It is funded and supported by the Foreign, Commonwealth and Development Office (FCDO) of the UK government through the RIAH project at the Humanitarian and Conflict Response Institute at the University of Manchester and the Tides Foundation. The opinions expressed in it do not reflect in any way the position of the UK government or the Tides Foundation who are not responsible for the content expressed in this document.
